Webinar: Taxonomy of teaching, learning and assessing

Speaker -Dr. N. Asokan

Objectives: The main objective of the training was to learn how to share differential objectives with the learners with focus in stating specific objectives, taxonomy tools and inclusion of Blooms' taxonomy for enhanced learning. When we teach, we want our students to learn, what we want them to learn as a result of our teaching are our objectives.

Instructional objectives are statements, which communicate in behavioral forms the expected performance of the students at the end of the instruction. The learning environment the teachers create, activities and experience they provide should be aligned with, or be consistent with the selected instructional objectives.

Six rules for stating specific objectives was good tool to reach the set targets for learners with focus on Blooms' Taxonomy further adds colored feathers to the teaching and learning process.
