"Explore the unknown, discover the wonder—every experiment is a great adventure!"

Science is not just about books, it's about exploration, discovery, and the thrill of finding out "why"! For our young learners, learning through experiments is the most powerful tool. It turns abstract ideas into tangible, fun experiences, making complex topics easy to grasp. We are thrilled to announce Quantum Quest Competition where young minds will showcase their scientific skills through exciting experiments.

"QUANTUM QUEST COMPETITION"
(A science experiment Competition)
Dated - 7.11.25
for Pre Primary

This event aims to celebrate the spirit of curiosity and scientific creativity through hands-on experiments. We invite passionate young scientists for the Solo Scientific Experiment Competition

IMPORTANT POINTS TO BE KEPT IN MIND:

- Each student will have to perform a science experiment, using their own materials.
- Preliminary Round will be held of 3.11.25. Selected students will proceed to the final round on 7.11.25 and will perform same experiment in front of judges.
- Participation is mandatory for all students as credit score for the same will be given.
- The experiment performed should be simple and child friendly.
- Students must bring their own well-labeled materials.
- The experiment should clearly demonstrate a scientific concept suitable for Pre Primary level.
- A brief verbal explanation of the experiment and its result is essential.
- Please ensure that the science experiment is safe and simple avoiding any hazardous material that may pose a risk to themselves or others.

Regards
Class Teacher
